

A Leading Manufacturer of Specialty Solvents in China.

Pentanes·Hexanes·Octanes·Buntanes·D Series Solvents

Junyuan Petroleum Group

Junyuan Petroleum Group is a leading manufacturer of pentanes, hexanes, octanes, butanes and D solvents with manufacturing facilities in Shandong and Xinjiang, China.

HISTORY

Junyuan Petroleum Group, founded in 2009 with the registered capital of 180 million RMB (roughly 27 million USD), is a general group gradually developed and improved, relying upon Dongying Junyuan Petroleum Technology Development Co., Ltd. Over the past eight years, Junyuan Petroleum Group has been continuously developed and expanded, and now incorporates five subsidiaries including Dongying Junyuan Petrochemical Technology Development Co., Ltd., Dongying Liangxin Petrochemical Technology Development Co., Ltd., Dongying Changyuan Petrochemical Technology Development Co., Ltd., Dongying Junyuan Logistics Co., Ltd, Sinkiang Liangxin Technology Development Co., Ltd and Orient Junyuan (Beijing) Technology & Trade Co., Ltd. They constitute a complete oil refining industry chain of Junyuan Petroleum Group.

Junyuan Petroleum Group

For more than 10 years, the Junyuan Petroleum Group has focused on being the leading manufacturer of pentanes, hexanes, benzenes and D solvents. From one office and a staff of ten to more than 500 of the industry's best and brightest, we have grown to be the largest specialty solvents provider serving for power generation, chemical feedstock applications, and domestic use.

Junyuan Petroleum Group is the largest specialty solvent manufacturer in China and also the largest environmental friendly hydrocarbon refrigerant and pentane blowing agent manufacturer in China, and the first enterprise in China to obtain the qualification of vegetable oil extraction solvent for food additives.

Junyuan Petroleum Group was founded in 2009 with a registered capital of 160 million US dollars (equivalent to 23.56 million US dollars). It is a comprehensive group relying on Dongying Junyuan Petroleum Technology Development Co., Ltd. and gradually developed and expanded.

Our seven series of products include propane series, pentane series, hexane series, solvent oil series, aromatics series, D series solvent oil and hydrogenated naphtha series.

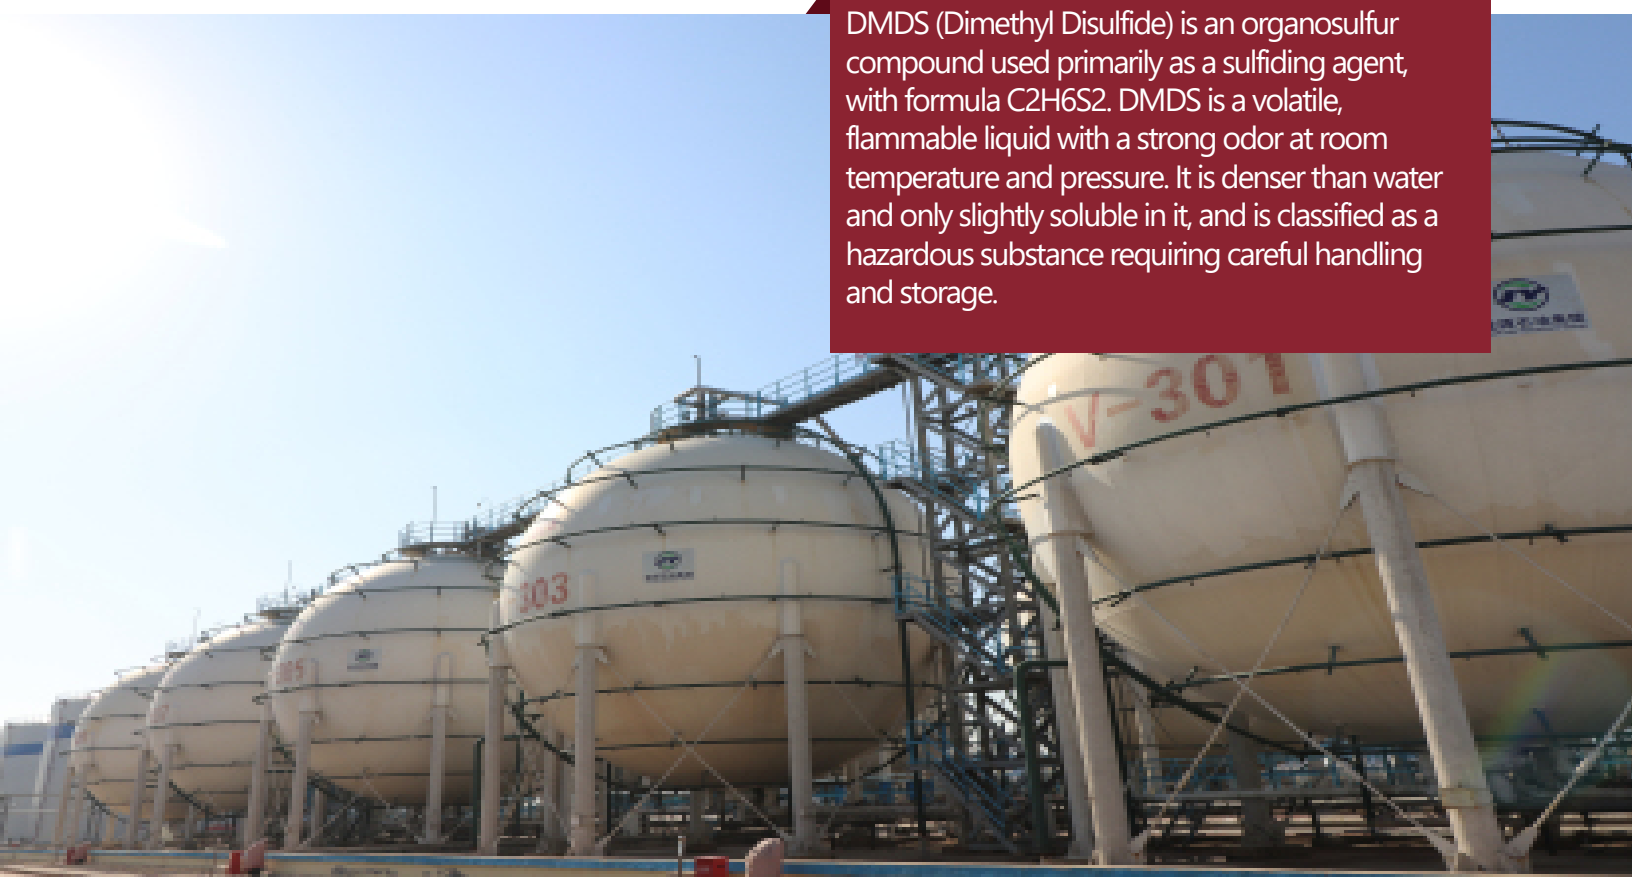

Products include propane, isobutane, n-butane, high clean liquefied gas, Isopentane, n-Pentane, cyclopentane, pentane blowing agent;

Isohexane, 99%
n-Hexane, 99%
n-Hexane, 95%
n-Hexane, 90%
n-Hexane, 80%
n-Hexane, 60%
n-Heptane, 99%
n-Octane, 99%
D Solvent 20
n-Pentane, 99%
Isopentane, 99%
Pentane Blends

DMDS (Dimethyl Disulfide)

DMDS (Dimethyl Disulfide) is an organosulfur compound used primarily as a sulfiding agent, with formula $C_2H_6S_2$. DMDS is a volatile, flammable liquid with a strong odor at room temperature and pressure. It is denser than water and only slightly soluble in it, and is classified as a hazardous substance requiring careful handling and storage.

Junyuan Petroleum Group is your premier choice for all your specialty solvent needs. We offer a broad line of solvent types and grades.

Molecular formula: $C_2H_6S_2$
Molar mass: 94.20
CAS Registry Number: 624-92-0
Appearance: colourless to pale yellow liquid with a strong sulfurous odor
Melting point: $-85\text{ }^{\circ}\text{C}$
Boiling point: $109.7\text{ }^{\circ}\text{C}$
Solubility: slightly soluble in water

JunyuanPetroleumGroup.com

Our team of scientists has experience in all areas of research including Life Science, Material Science, Chemical Synthesis, Analytical and many others.

DMDS is a traditional sulfiding agent widely used to pre-sulfide and activate hydrotreating catalysts in refineries.

DMDS is stored exclusively in ISO tanks or 200L steel drums due to its hazardous, flammable classification.
