

A Leading Manufacturer of Specialty Solvents in China.

Pentanes·Hexanes·Octanes·Buntanes·D Series Solvents

Junyuan Petroleum Group

Junyuan Petroleum Group is a leading manufacturer of pentanes, hexanes, octanes, butanes and D solvents with manufacturing facilities in Shandong and Xinjiang, China.

HISTORY

Junyuan Petroleum Group, founded in 2009 with the registered capital of 180 million RMB (roughly 27 million USD), is a general group gradually developed and improved, relying upon Dongying Junyuan Petroleum Technology Development Co., Ltd. Over the past eight years, Junyuan Petroleum Group has been continuously developed and expanded, and now incorporates five subsidiaries including Dongying Junyuan Petrochemical Technology Development Co., Ltd., Dongying Liangxin Petrochemical Technology Development Co., Ltd., Dongying Changyuan Petrochemical Technology Development Co., Ltd., Dongying Junyuan Logistics Co., Ltd, Sinkiang Liangxin Technology Development Co., Ltd and Orient Junyuan (Beijing) Technology & Trade Co., Ltd. They constitute a complete oil refining industry chain of Junyuan Petroleum Group.

2009

Founded in 2009 to solve a customer's
speciality solvents needs

20+

More than 20 active products

Expansive global distributor networks

60+

Champions of more than 60
different technologies

GROWTH

New, innovative product
introductions every year

Headquarters open in a small village yard in Dongying

2009

Junyuan has only 10+ employees and roughly ten acres of land

Junyuanpetroleumgroup.com

2010

Junyuan begins to plan for development

2011

The production plant begins to take shape

Junyuan's production capacity reaches nearly 100,000 tons

Junyuan's 2nd plant in Xinjiang is launched

2012

In 2012, Junyuan's development momentum is overwhelming, with more than 100 employees

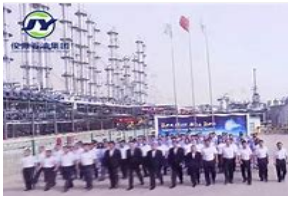

2013

Junyuan's business development takes off

The company has got 5 subsidiaries.

Junyuan's staff expands to hundreds

2014

Junyuan's business development is stable and mature, maintaining high-speed growth

Junyuan becomes the only manufacturer that can produce n-Hexane with purity up to 99.99% in China

Introduction of 7x24 Rapid Customer Service for the growing maintenance business

Junyuan's hexanes and pentanes, stand out in the fierce competition market

Explosive growth in the pentane and hexane market

Junyuan's own internal journal Junyuan People is launched

Junyuan decides to produce industrial refrigerant according to the requirements of Univision standards in the US and the purity of the product reaches 99.9%

Against the trend, Junyuan once again increases production investment, improve product quality in an all-round way

Junyuan becomes the No.1 manufacturer of reagent grade n-Hexane,99% in China

Junyuan starts to transform and upgrade

2016

Junyuan ranks No. 1 in specialty solvents industry competitive analysis in China market

Growth in the pentane blends market explodes

Junyuan further develops its brand, which has a positive impact on n-Hexane and its upstream and downstream industries.

2017

Sinopec, PetroChina and many of its enterprises deeply recognize the reputation of Junyuan, which enables Junyuan to sign the network access certificate of the two petroleum giants in China and establish a long-term cooperative relationship with their enterprises.

No.1 CHINA

Opening an office in Beijing is an important step in Junyuan's international expansion.

Large expansion into 7 series of products: propane, pentane, hexane, solvent oil, aromatics, D Solvents and hydrogenated naphtha

People's Daily Reports:Junyuan Petroleum Group maintains the top position as the largest pentane blends manufacturer in China.

Junyuan Service Center expansion

2018

Junyuan is awarded the honorary title of "Intellectual Property Demonstration Enterprise"

State Intellectual Property Office of The P.R.C
中华人民共和国国家知识产权局

Junyuan obtains the sales network access certificate of Sinopec, PetroChina and CNOOC.

The Light Hydrocarbon and Aromatics Professional Committee of China Petroleum ,Chemical Industry Federation are established in Beijing, Junyuan becomes the founding member

Junyuan's lab is recognized as Dongying Engineering Laboratory by Dongying Development and Reform Commission

2009-2019:Junyuan expands to 16 service centers across China

2019

Junyuan fulfills the order of 1,500 tons pentane blowing agent to Middle East market

10 Years of Success!

Junyuan successfully passes the energy measurement review of key energy consumption enterprises

The project "Research and Industrialization of n-Hexane High-purity Refining Technology" is selected as the first prize of excellent achievement award of technological innovation in Shandong Province.

Junyuan is selected as one of the top 100 petroleum and chemical enterprises in Shandong Province in 2019

Junyuan participates in the revision of the National Standard of Pentane Blowing Agent

The industrial standard of n-Pentane for industrial use jointly proposed by Sinopec Shanghai and Junyuan is listed in the national project plan in 2020.

2020

Mr.Miao Guangfa, Chairman of Junyuan Petroleum Group, is awarded the honorary title of May 1st Labor Medal of Shandong

The provincial Yellow River Delta Agricultural High-tech Zone conducts expert review on Junyuan's technical transformation and project safety

After 2 years of construction, Junyuan completes the Key Laboratory of Hydrocarbon Solvents in Dongying

2020:Junyuan completes the R & D and commissioning of n-Heptane,99% and n-Octane,99% with the fastest speed,and successfully launches the two new products to the market

Isohexane for Industrial Use (Hg / T5612-2019) and Isopentane for Industrial Use (Hg / T5613-2019) drafted by Junyuan in 2018 is officially implemented on July 1, 2020. Announcement No.61 of 2019 issued by the Ministry of Industry and Information Technology of the People's Republic of China

Another invention patent of Junyuan is authorized by the State Intellectual Property Office. The patent name is "a device and method for hydrotreating distillation separation and joint production of customized naphtha raw materials", patent No.: ZL 201711267832x.

Junyuan Petroleum Group

For more than 10 years, the Junyuan Petroleum Group has focused on being the leading manufacturer of pentanes, hexanes, benzenes and D solvents. From one office and a staff of ten to more than 500 of the industry's best and brightest, we have grown to be the largest specialty solvents provider serving for power generation, chemical feedstock applications, and domestic use.

Junyuan Petroleum Group is the largest specialty solvent manufacturer in China and also the largest environmental friendly hydrocarbon refrigerant and pentane blowing agent manufacturer in China, and the first enterprise in China to obtain the qualification of vegetable oil extraction solvent for food additives.

Junyuan Petroleum Group was founded in 2009 with a registered capital of 160 million US dollars (equivalent to 23.56 million US dollars). It is a comprehensive group relying on Dongying Junyuan Petroleum Technology Development Co., Ltd. and gradually developed and expanded.

Our seven series of products include propane series, pentane series, hexane series, solvent oil series, aromatics series, D series solvent oil and hydrogenated naphtha series.

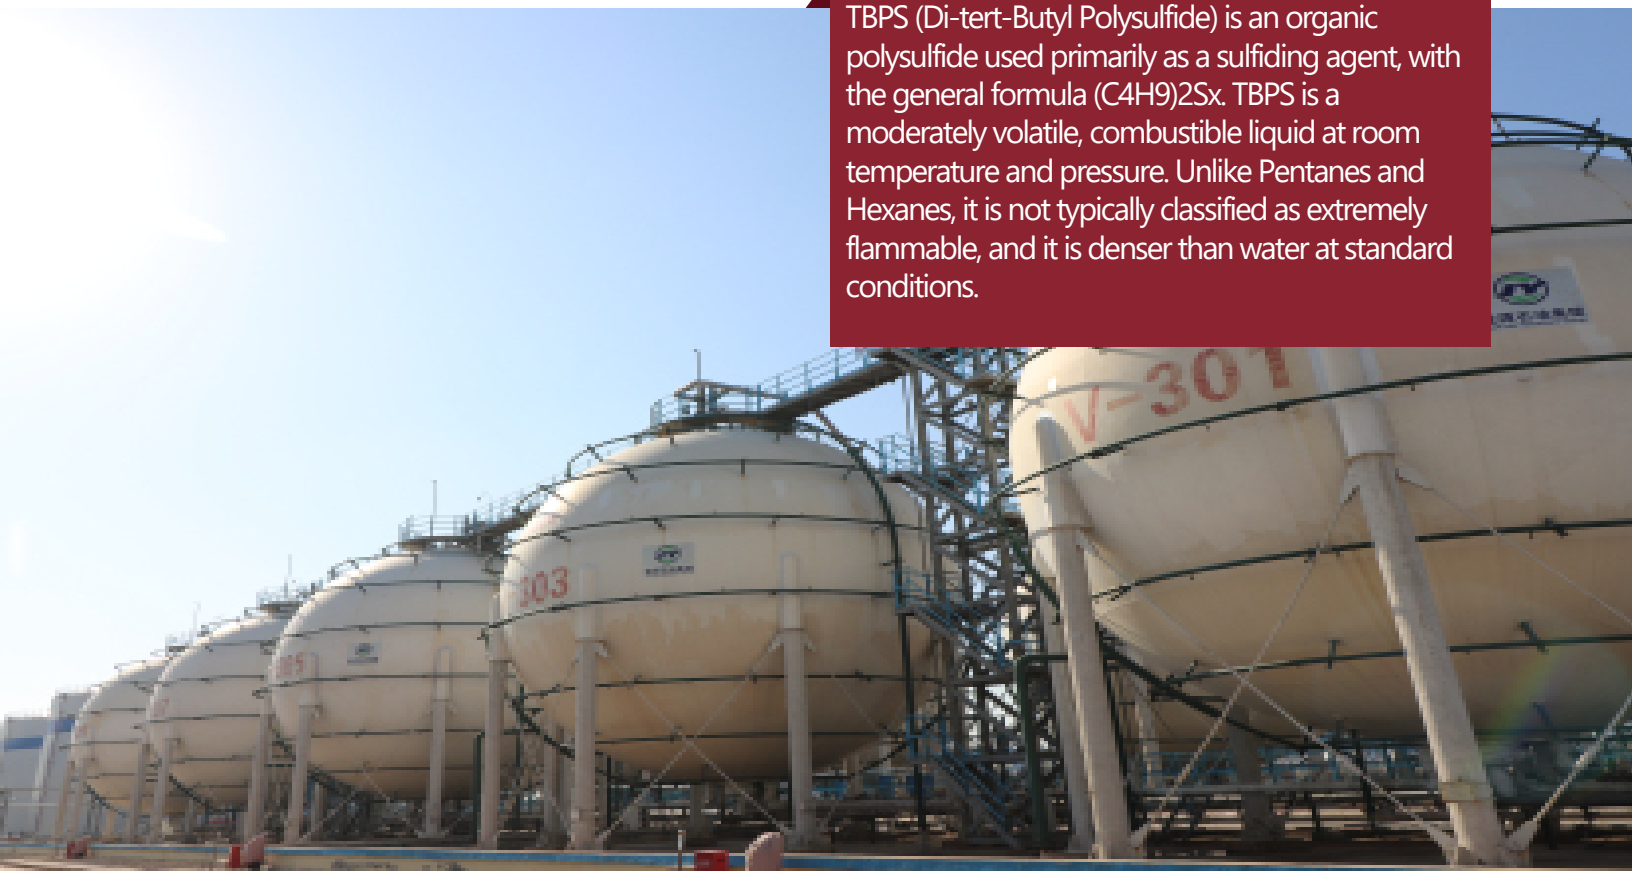

Products include propane, isobutane, n-butane, high clean liquefied gas, Isopentane, n-Pentane, cyclopentane, pentane blowing agent;

TBPS (Di-tert-Butyl Polysulfide)

TBPS (Di-tert-Butyl Polysulfide) is an organic polysulfide used primarily as a sulfiding agent, with the general formula $(C_4H_9)_2S_x$. TBPS is a moderately volatile, combustible liquid at room temperature and pressure. Unlike Pentanes and Hexanes, it is not typically classified as extremely flammable, and it is denser than water at standard conditions.

Junyuan Petroleum Group is your premier choice for all your specialty solvent needs. We offer a broad line of solvent types and grades.

Molecular formula: $(C_4H_9)_2S_x$
Molar mass: varies with sulfur content (x)
CAS Registry Number: 68937-96-2
Appearance: yellow to amber liquid with a mild sulfurous odor
Melting point: refer to COA
Boiling point: refer to COA
Solubility: insoluble in water

Our team of scientists has experience in all areas of research including Life Science, Material Science, Chemical Synthesis, Analytical and many others.

TBPS is widely used as a sulfiding agent for pre-sulfiding and activating hydrotreating catalysts in refineries.

Usually, TBPS or DMDS is selected based on catalyst type and refinery preference. Usually, TBPS is shipped in ISO tanks, IBC totes, or steel drums.
